Planning & Landscape Architecture

Land development projects involve the coordination of efforts from many areas of expertise. SEC Group, Inc. is the industry resource for engineering, surveying, construction and land planning disciplines, working to bring your land development projects to fruition.

Our project experience ranges from residential and commercial to industrial and institutional developments. SEC becomes a true partner with clients through our emphasis on a team approach. We continuously examine cost-efficient designs to provide economical solutions for our clients, from project inception to final completion. Our multiple areas of expertise mean we can provide comprehensive services allowing us to streamline the process. This approach results in increased project efficiency, more effective project management and improved communication for our clients.

SEC has the ability to handle any project, from single-unit developments to sites in excess of 1,000 acres. From conceptual planning through final site design, we use sophisticated computer software to prepare engineering reports, exhibits and contract documents. Necessary state, local and federal site work permits are obtained efficiently to help our clients avoid delays and stay on-schedule.

Our services include:

- Site feasibility studies
- Entitlements
- Conceptual Planning
- Preliminary engineering & platting
- Final engineering & platting
- Stormwater management
- Erosion control & sedimentation
- Permit applications
- Transportation studies & design
- Construction staking
- Construction assistance

Uncommon
Commitment

Every Project. Every Time.
