Engineering ■ Surveying ■ Planning ■ Landscape Architecture

## Structural Engineering

- Municipal Engineering
- Transportation Engineering
- Construction Engineering
- Water Resources Engineering
- Land Development Engineering
- Water & Wastewater Engineering
- Surveying Services
- Planning & Landscape Architecture

At the core of each project is its structural framework. Precision and detail are critical elements to project success. Our team of experts works together and is laser focused on detail, offering the promise of solid engineering from the start. By ensuring project integrity, we pave the way for smooth permitting, inspection and construction to keep projects on time and within budget.

SEC's experienced structural engineering staff is familiar with varying types of bridge projects from simple to multi-span bridges for local and state agencies. We have completed projects involving historic structures requiring Illinois Historic Preservation Agency (IHPA) coordination as well as those projects involving the analysis and evaluation of right-of-way, utility and traffic staging requirements.

SEC will tailor a successful approach to each project undertaken in a way that addresses that project's unique attributes. Our expertise is in being certain that both design and impact to the community are managed consistently and without compromise.

### Our services include:

- Structural and Approach Design
- Bridge Inspection Services
- Signal System Development and Timing
- Volume, Speed and Sign Studies
- Permitting
- Environmental Assessments

*Uncommon  
Commitment*

*Every Project. Every Time.*
