## Surveying Services

- Municipal Engineering
- Transportation Engineering
- Construction Engineering
- Water Resources Engineering
- Land Development Engineering
- Water & Wastewater Engineering
- Structural Engineering
- Planning & Landscape Architecture

SEC provides Land Surveying and Construction Staking services for various types of land development projects. Our services range from the initial topographic and ALTA/ACSM land title survey to preliminary and final plat of subdivisions including plats of zoning, annexation, or easements.

Our project experience ranges from 2,000+ acre residential developments and suburban commercial/ industrial developments. SEC provides construction staking for mass grading, sanitary sewer, storm sewer, water main, dry utilities, pavement, curb and gutter, and record drawings for submittal to the governing municipality.

Following construction of roads and lots, SEC provides houseline surveying services to meet municipality requirements for building permits plats, foundation staking, spot foundation survey, finish grading staking and plat of survey for occupancy. SEC maintains multiple survey crews in each of our four office locations to provide our services at a local cost with prompt service.

SEC's team of licensed surveyors welcomes an opportunity to discuss your projects and develop solutions to fit your needs.

- Our services include:**
- GPS/Geodetic control surveys
  - Photogrammetric mapping
