Engineering ■ Surveying ■ Planning ■ Landscape Architecture

## Transportation Engineering

- Municipal Engineering
- Construction Engineering
- Water Resources Engineering
- Land Development Engineering
- Water & Wastewater Engineering
- Structural Engineering
- Surveying Services
- Planning & Landscape Architecture

Transportation planning must consider both the project's environmental impacts and its ability to move people, services, and goods. We establish sound roadway rehabilitation and maintenance programs that preserve our client's investments in existing pavement structures, emphasizing safety, productivity, and cost efficiency, minimizing expensive reconstruction.

We have designed road, street, and highway projects ranging from local subdivisions to freeways. Our experience includes construction of new alignments, reconstruction of existing roadways, and widening and resurfacing projects. We produce environmentally sensitive designs that fit within the context of the community. Our projects also include bike paths, landscaped medians, decorative retaining walls, and bridge treatments.

SEC's full range of engineering and surveying services will lead your roadway project smoothly from "paper to pavement."

### Our services include:

- Structural Services
- Roadway Design & Construction
- Signal System Development & Timing
- Volume, Speed & Sign Studies
- Permitting
- Environmental Assessments
- Roadway Lighting & Design
- Rehabilitation & Maintenance Programs
- Traffic Impact, Feasibility & Drainage Studies

*Uncommon  
Commitment*

*Every Project. Every Time.*
