Planning & Landscape Architecture

From conceptual planning, modeling and review, to permitting and final site design, SEC Group, Inc.'s team of Water Resource specialists balances the needs of development with the importance of natural resource protection and regulatory compliance. Our team is well-versed in the preparation of all necessary permit applications, and is experienced with the requirements of jurisdictional regulatory agencies that help keep projects on schedule. Our Water Resource Staff includes Certified Stormwater Review Specialists, Enforcement Officers and Certified Floodplain Managers and provides Ordinance Compliance Reviews for many municipal clients. We are IDOT prequalified for preparing Hydraulic Reports: Simple Waterways and Complex Waterways.

Our environmental scientists can delineate wetland boundaries, assist with jurisdictional and isolated wetland impacts permitting, and prepare wetland mitigation plans. We are experienced in the U.S. Army Corps of Engineers' Section 404 and Section 10 permits and can perform endangered species surveys. SEC can also prepare planting specifications for naturalized and wetland-type stormwater management basins.

Our services include:

Watershed Master Planning
Floodway/Floodplain Analysis and Reports
LOMA/LOMR Submittals
NPDES Permitting
Location Drainage Studies and Hydraulic Reports
Hydrologic and Hydraulic Studies
Streambank Stabilization
Wetland Services
Stormwater Ordinance Compliance Reviews

Uncommon
Commitment

Every Project. Every Time.
